design. We have participated in and supported energy efficiency lighting projects throughout the world.

Designing With Light : About US
The profession of architectural lighting design is a relatively young industry, even though the practise of what we do in determining where there is light and where there isn't has been around for centuries. Of course back then this was simply people deciding where to put candles or, as far back as the 9 th century, where to locate oil lamps.

Confessions of a lighting designer
– what is lighting design?

Download Free Architectural Lighting

Architectural lighting focuses on three aspects of the illumination of buildings or spaces. The first architectural element is the aesthetic appeal of a building, which is important in the illumination of retail environments. Second, the ergonomic aspect: the measure of how much of a function the architectural lighting plays.
