I recently bought part of a Compaq Proliant 3000 at a computer garage sale. It is just the drive cage, with 8x9.1GB scsi drives and the board on the back of the cage that the drives plug into. I hooked power up to the power connector and 1 scsi cable (internally and externally on the card) and all that happens is the 3 lights on the trays all light up and then go off. The first drives(top,left ...
