Rolls-Royce engines use the name Trent for each engine, with the Trent XWB powering the A350 and Trent 1000 powering the 787. However, Rolls-Royce, too, has found itself mired in issues over some of its engine types. The Trent 1000 has seen multiple issues over the years, requiring replacements and grounding aircraft across the globe.

GE, Rolls Royce, Pratt & Whitney : Who Rules the Engine ...

The Rolls-Royce Trent is a family of high-bypass turbofans produced by Rolls-Royce. It continues the three spool architecture of the RB211 with a maximum thrust ranging from 61,900 to 97,000 lbf. Launched as the RB-211-524L in June 1988, the prototype first ran in August 1990. Its first variant is the Trent 700 introduced on the Airbus A330 in March 1995, then the Trent 800 for the Boeing 777, the Trent 500 for the A340, the Trent 900 for the A380, the Trent 1000 for the Boeing 787, the Trent XW

The Rolls-Royce RB.23 Welland was Britain's first production jet engine. It entered production in 1943 for the Gloster Meteor. The name Welland is taken from the River Welland, in keeping with the Rolls-Royce policy of naming early jet engines after rivers based on the idea of continuous flow, air through the engine and water in a river.. The engine was originally developed by Frank Whittle's ...

The Rolls-Royce Trent XWB is a high bypass turbofan produced by Rolls-Royce plc. In July 2006, the Trent XWB was selected to power exclusively the Airbus A350 XWB. The first engine was run on 14 June 2010, it first flew on an A380 testbed on 18 February 2012, it was certified in early 2013, and it first flew on an A350 on 14 June 2013. It had its first in-flight shutdown on 11 September 2018 as ...

Rolls-Royce Trent XWB - Wikipedia

The Rolls-Royce RB.41 Nene is a 1940s British centrifugal compressor turbojet engine. The Nene was a complete redesign, rather than a scaled-up Rolls-Royce Derwent with a design target of 5,000 lbf, making it the most powerful engine of its era. It was Rolls-Royce's third jet engine to enter production, and first ran less than 6 months from the start of design. It was named after the River Nene in keeping with the company's tradition of naming its jet engines after rivers. The design saw relativ
