Read Online Life On Intertidal Rocks A Guide To The Marine Life Of The Rocky North Atlantic Coast Nature Study Guides

The intertidal community is the one that comprises of organisms that live in the area that's covered with water at high tides. This means that there are also spaces that are exposed to air at the time of low tides. The intertidal rocks have also been known as seashore or foreshore. Algae and mussels do compete for the space while on intertidal.

~~Which of the Following Compete for Space on Intertidal Rocks?~~
