# Read Book The Economics Of Ecosystems And Biodiversity In National And International Policy Making Teeb The Economics Of Ecosystems And Biodiversity

The Economics of Ecosystems and Biodiversity was a study led by Pavan Sukhdev from 2007 to 2011. It is an international initiative to draw attention to the global economic benefits of biodiversity. Its objective is to highlight the growing cost of biodiversity loss and ecosystem degradation and to draw together expertise from the fields of science, economics and policy to enable practical actions. TEEB aims to assess, communicate and mainstream the urgency of actions through its five deliverable

The Economics of Ecosystems and Biodiversity - Wikipedia

'TEEB brings a rigorous economic focus to bear on the problems of ecosystem degradation and biodiversity loss, and on their impacts on human welfare. TEEB is a very timely and useful study not only of the economic and social dimensions of the problem, but also of a set of practical solutions which deserve the attention of policy-makers around the world.'

The Economics of Ecosystems and Biodiversity TEEB: The ...

The Economics of Ecosystems and Biodiversity (TEEB) is a global initiative assessing the costs of the loss of biodiversity and the associated decline in ecosystem services worldwide. It can help decision-makers recognize, demonstrate and capture the values of ecosystem services and biodiversity. TEEB is now in its third phase.
